### DETAILED ACTION

1. This action is in response to the communication filed on 10/01/2003.

Claims 1-26 are pending in the application.

### *Specification*

2. The following guidelines illustrate the preferred layout for the specification of a utility application.

These guidelines are suggested for the applicant's use.

### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The arrangement of this Application does not have at least (f) and (g), where with (f) it should be include with (1) and (2). Therefore, it is object to. An amendment to the specification pursuant to 37 CFR 1.77 is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 23-26 recite a program that comprise a machine readable medium, generators, etc. A program is known for comprising code/instructions. It is not know the meaning of the limitation "program" in the preamble.

***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. The claims ~~21~~<sup>27</sup>-26 are rejected under 35 U.S.C 101 because the claimed invention is directed to non-statutory subject matter.

The Claims 22-26 are claiming a "computer program". See the preamble: "A program for creating an application". Claiming a program per se is not statutory as set forth under 35 U.S.C. 101.

To expedite a complete examination of the instant application the claims rejected under 35 U.S.C. 101 (nonstatutory) above are further rejected as set forth below in anticipation of application amending these claims to place them within the four statutory categories of invention.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Dan et al., US Pat No. 6,560,639 B1.

Given the broadest reasonable interpretation of followed claims in light of the specification.

As per Claim 1: Dan discloses, *A system (See FIG. 2), comprising:*

*a controller generator that is adapted to provide an application with a controller that receives a request for data from a user and responds to the request by sending information to the user in a predetermined format (See FIG. 3-4);*

*and a layout manager generator that is adapted to provide a layout manager that formats a c-frame based on configuration information and renders the c-frame (e.g. all the dots in the section Admin, For example, see FIG. 7; the designed selections of this configuration information from Web designers will render the layout C-frame of FIG. 13) as part of the information sent to the user in response to the request (See the Admin provided in FIG. 9 etc.).*

As per Claim 2: Dan discloses, *The system set forth in claim 1, wherein the controller is adapted to read the configuration information from a configuration file (See FIG 7) .*

As per Claim 3: Dan discloses, *The system set forth in claim 2, wherein the configuration file is an extensible markup language ("XML") file (NOTE XML is an extensible HTML file: See contents given in FIG. 7).*

Art Unit: 2191

As per Claim 4: Dan discloses, *The system set forth in claim 2, wherein the configuration file contains configuration information corresponding to a plurality of portals (HTML code per se that provides to connection to a service).*

As per Claim 5: Dan discloses, *The system set forth in claim 4, wherein the layout manager is adapted to produce a different c-frame in response to requests received via each of the plurality of portals (HTML code per se that provides to connection to a service).*

As per Claim 6: Dan discloses, *The system set forth in claim 1, wherein the c-frame comprises a header, a left side bar and a footer (See FIG. 13).*

As per Claim 7: Dan discloses, *The system set forth in claim 6, wherein the header comprises a head.jsp object and a top.jsp object.* (Back to FIG. 7, refer to content Objects that render the C-Frame of FIG. 13)

As per Claims 8-14, and 15-21: Dan discloses the claimed limitation as addressed in the same reason as in Claims 1-7 above, respectively.

As per Claims 22-26: Dan discloses the claimed limitation as addressed in the same reason as in Claims 1-5 above, respectively.
